Keysight U1700 Series
Handheld LCR Meters

Data Sheet

Test passive components conveniently, affordably *and* reliably with the Keysight U1700 Series LCR meters—extending the tradition of industry-leading benchtop units

KEYSIGHT TECHNOLOGIES

Introduction

The Keysight Technologies, Inc. U1700 Series handheld LCR meters expand Keysight's portfolio of handheld tools into electronics assembly and passive components troubleshooting. Better yet, these handheld models extends the tradition of Keysight's industry-leading benchtop units to more affordable and portable forms. Keysight's latest handheld LCR meters in all-new orange offer capabilities and functionalities equivalent to the A models.

No waiting for quick, basic LCR tests

Sharing a bench LCR meter is practical, but isn't always convenient. With Keysight's new line of handheld LCR meters, you can perform quick, basic LCR measurements at your convenience. Now that they're available at a lower price point compared to traditional benchtop units, everyone on your team can be equipped for passive-component testing—on the bench or on the go—without the wait.

Uncompromised quality and reliability

The handheld LCR meters are housed in robust overmold and tested to stringent industrial standards.

Features

- 20,000 counts resolution
- Dual display with backlight (for U1732A/U1732B)
- Wide LCR ranges with 2 to 4 selectable test frequencies
- Auto-calculation of phase angle (for U1732A/U1732B), dissipation factor and quality factor
- Tolerance mode: 1%, 5% and 10% (20% with U1732A/U1732B)
- Relative mode
- Hold and Min/Max/Average recordings
- Data logging to PC with optional IR-to-USB cable
